

Medicaid Updates

AFMC Provider Relations Outreach Team

CMS Directive

- Currently, AR Medicaid allows certain provider types (FQHC-49, AHEC-69, and UAMS-81) to be enrolled as a single entity provider. AR Medicaid beneficiaries are assigned to the single entity provider instead of the individual PCP providing services for the client.
- Because the Affordable Care Act (ACA) requires the National Provider Identifier (NPI) of the Ordering, Referring, Prescribing, (ORP) provider to be on the claim form for services provided (i.e., lab, x-ray, therapy, home health, etc.), the ORP provider must be enrolled as an AR Medicaid PCP and carry the AR Medicaid beneficiary caseload.

CMS Directive

- Effect on facilities that are not single entity providers:
 - When receiving referrals from a single entity provider, make sure the PCP assigned per the MMIS portal matches who the referral is from.
 - If a claim denies for incorrect PCP referral, please check the portal to see if you need an updated referral form from the newly assigned PCP instead of the group.

Behavioral Health Counseling Services

- Section 205.100, 292.740, and 292.741 from the Physician manual
- Counseling Services
 - The counseling procedures covered under the Physician Program are allowed as a covered service when provided by the physician or when provided by a qualified practitioner who by State licensure is authorized to provide them. Only one (1) counseling visit per day is allowed in the physician's office, the outpatient hospital, or nursing home. Place of Service Code 22 Outpatient Hospital, 11 Doctor's Office and 12 Patient's Home.
- Behavioral Health Screen
 - A physician, physician's assistant, or advanced nurse practitioner may administer a brief standardized emotional/behavioral assessment screening to a client along with an office visit. The allowable screening is up to two (2) units per visit and is allowable up to four (4) times per state fiscal year without prior authorization.
